

GAURAV SHARMA

Machine Learning Engineer | AI/LLM Specialist

+91-7489121989 | gauravsharma27390@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Results-driven ML Engineer with expertise in NLP, Generative AI, and LLMs. Built 3 production-ready AI applications (500+ downloads, 98% uptime): RAG-based PDF chatbot (92% accuracy), resume screening system (88% precision, 8h→45min), and deepfake detector (95% accuracy, 8s→2s). Proficient in Python, LangChain, FAISS, Streamlit, and focused on scalable, efficient AI solutions.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL (MySQL)

AI/ML: NLP, Deep Learning (CNN, ResNet50), Computer Vision, OpenCV, TensorFlow

Generative AI: RAG, LangChain, Ollama (LLaMA3), Hugging Face, Prompt Engineering

Databases & Tools: FAISS, Vector Embeddings, Streamlit, Flask, GitHub, Hugging Face Spaces

EDUCATION

B.Tech Computer Science Engineering

- Vikrant Institute of Technology & Management, Gwalior | 2022–2026 | CGPA: 7.31

WORK EXPERIENCE

Python Development Intern | CodSoft | Jan 2025 – Jan 2025

- Developed 5+ Python automation applications reducing processing time by 70%; implemented OOP architecture improving maintainability by 50%
- Optimized performance achieving 40% speed improvement; collaborated with 3+ developers using Git in Agile environment

PROJECTS

DocuMind AI – RAG-Powered PDF Chatbot | March 2026

[GitHub](#) | [Live Demo](#)

- Built RAG-powered PDF chatbot using Ollama LLaMA3, processing 100+ pages with 92% context accuracy using FAISS semantic search
- Reduced query latency by 60%; deployed on Hugging Face with 500+ downloads, 98% uptime, voice input (8+ languages)

AI-Powered Resume Screening System | Aug 2025

[GitHub](#) | [Live Demo](#)

- NLP-based system ranking 500+ resumes using TF-IDF and cosine similarity, achieving 88% precision across 200+ job descriptions
- Reduced manual screening from 8 hours to 45 minutes per batch; created Streamlit interface with CSV upload and downloadable shortlists

Deepfake Video Detection System | Jul 2025

[GitHub](#) | [Live Demo](#)

- Deep learning model using ResNet50 achieving 95% accuracy in real/fake video classification with frame-by-frame analysis (30+ frames/video)
- Optimized inference from 8 seconds to 2 seconds per video through batch processing and algorithm optimization

CERTIFICATIONS & ADDITIONAL

Certifications: Data Analytics – Accenture (Forage) | Data Visualization – Tata Group (Forage) | Data Analytics – Deloitte | Intro to Data Science – Cisco

Languages: English (Fluent), Hindi (Native)

GitHub: Active contributor to ML/AI projects
